

TDCJ Computer Recovery Authorized DM15 Class Codes

State Property Accounting (SPA) User Guide defines DM 15 as the following:

Disposal Method 15 (Surplus Sent to the TDCJ Computer Recovery Program)

This disposal method is used for data processing equipment *not* sold or transferred through the surplus process or by other means. This disposal method should be used to delete data processing equipment after pickup by TDCJ.

Note: Data processing equipment is defined as central processing units, front-end processing units, mini-processors, microprocessors and related peripheral equipment such as data storage devices, document scanners, data entry equipment, terminal controllers, data terminal equipment, computer-based word processing systems other than memory typewriters and equipment and systems for computer networks.

Due to SPA User Guide revisions over the years the class codes shown below may or may not still be in use by your agency or assigned to these properties.

Properties assigned with these class codes will be sent back automatically from TFC to the owning agency, once the mandatory 10-business day advertising period has ended. State agencies should only dispose of these properties using DM 15, unless authorized by TFC prior to disposal.
